Dear Sir/Mam,

I am writing to express my interest in the Angular Developer, Data Analyst, Data Science, Python Developer and Full Stack Developer position at your company. I have one year experienced as a Software Engineer. I have worked in technology Angular, GIT, JIRA, Postman. As a recent graduate in BE (Computer Science) with a strong training background in Data Science from Imarticus Learning Pvt Ltd and Full Stack Development from KodNest Pvt Ltd. I am excited to begin my career in the field and make a positive impact at your organization.

I have gained experience in a variety of programming languages, including Angular 16, Python, Data Science, Tableau, Power Bi, Java, SQL, Typescript, GIT, JIRA, HTML5, CSS3. I am also familiar with the full software development life cycle, from requirement gathering to deployment and maintenance. My coursework from Imarticus Technologies has included several projects where I've worked on Data Science and Machine Learning project, such as Win Prediction Analytics using Logistics Regression (Python), Bike Sharing Prediction using Linear Regression (Python), Made Superstore Dataset Dashboard using Tableau.

I am a quick learner and have a strong attention to detail which I believe would be valuable assets in this role. I am also very excited about the opportunity to work with a talented team and am eager to continue my professional development. I am highly motivated and would be honoured to be given the opportunity to contribute to the growth of your company.

I would welcome the opportunity to discuss the position further and to learn more about the specific requirements for this role. Please feel free to contact me at aaquibansari1998@gmail.com.

Thank you for your time and consideration.

Sincerely,
Ansari Mohd Aaqib Mohd Shafeeque
